SUMMARY

Backend software engineer with 2+ years of professional experience at Accenture delivering enterprise C# and ASP.NET Core systems on Azure across e-commerce and IoT platforms. Holds an MS in Computer Science from Cleveland State University and has independently built deployed projects including an AI legal chatbot and a .NET e-commerce platform, both available on GitHub.

EDUCATION

Masters' in Computer Science | Cleveland State University

GPA: 3.5/4.0 | May 2025

Relevant Coursework: Programming, Data Mining, Distributed System, Analysis of algorithm, Data Communication

Idea presentation: CIS 620 | Google's Chubby Lock Service | [View Presentation](#)

Bachelors' in Computer Science | Nagpur University

GPA: 3.5/4.0 | May 2020

Relevant Coursework: Advance java, Linux, Object Oriented Programming, Operating systems, DBMS

Internship project thesis: Traffic monitoring analytics system | [View Thesis](#)

PROFESSIONAL EXPERIENCE

Total Wireless By Verizon, Cleveland, Ohio | Software Engineer

Apr 2026 – Present

- Partnered with L2/L3 engineering teams to escalate and track complex software defects, providing detailed reproduction steps, environment configurations that increased development team response and improved overall product stability.

Iron Mountain, Stow, Ohio | System Engineer

Dec 2025 – Mar 2026

- Maximize software to maintain asset transaction data, resolve discrepancies and support audit ready reporting across its lifecycle.
- Partnered with IT and operations to document recurring system issues, creating playbooks that reduced repeat escalations.

Accenture Inc. | Application Development Analyst | Client: Ecolab Inc

Nov 2020 – Jan 2023

- Implemented serverless workflows with C# and Azure Functions integrated with SQL Server and Cosmos DB, streamlining enterprise processes and ensuring compliance with structured design methodologies.
- Enhanced data throughput by 20% via Azure Service Bus, APIs, and optimized SQL/PLSQL procedures, aligning with Oracle-style coding and migration standards to improve operating efficiency.
- Reduced API response times by refining SQL queries and restructuring database models, supporting seamless integration of reports, interfaces, and conversions within business-critical applications.
- Developed ASP.NET Core applications and APIs connected to Oracle/SQL backends, leveraging Agile practices to deliver functionality aligned with financial and HR workflows.
- Delivered end-to-end deployments across DEV/QA/PROD environments using CI/CD pipelines, ensuring defect-free releases, adherence to migration standards, and stakeholder readiness.
- Partnered with Level 2 support to resolve production issues, maintain uptime, and deliver baseline technical support for enterprise applications, boosting operational stability and efficiency.
- Got Innovative idea award for a chatbot based onboarding concept to improve first-day experience for new hires. [View Recognition](#)

Software Development Intern | Adivid Technologies Inc., India | Client: Government of Maharashtra

Jun 2019 – May 2020

- Maintained and enhanced a large-scale Android application, ensuring data accuracy and integrity by developing SQL-based workflows to process government service requests.
- Optimized backend APIs and SQL query performance, reducing latency by 45%, improving reporting efficiency, and enabling faster data-driven decision-making for enterprise stakeholders.

ACADEMIC AND PERSONAL PROJECTS

Know Your Legal Rights Chat Bot: ASP.NET Core, Open AI LLM, Azure App Service, C# | [Live Demo](#)

Jul 2025

- Created an AI chatbot capable of handling 30+ unique legal scenarios in plain English, enabling drivers in Ohio to receive instant guidance on ID requests, searches, and Miranda rights during police stops.
- Engineered the prompt and C# logic with the OpenAI API to achieve response accuracy against a test set of common legal questions, reducing the risk of misinformation in high-stress scenarios.

Bookshop Web Application: .NET 8, ASP.NET Core MVC, Entity Framework Core | [View Github Repo](#)

Jun 2022

- Designed a complete e-commerce bookstore in .NET 8 using Repository and Unit of Work patterns.
- Integrated Stripe for secure/seamless payment processing, enhancing user trust and improving the overall transaction experience.

TECHNICAL SKILLS & CERTIFICATIONS

Languages & Databases: C#, Java, SQL, PL/SQL, Oracle Database, MS SQL Server, Cosmos DB, Blob Storage

Frameworks & Tools: ASP.NET MVC, Razor Pages, Azure Kubernetes Service

Cloud & DevOps: Azure (Functions, DevOps), Docker, GitHub, CI/CD, Azure App Insights, Azure SQL, Azure Active Directory

APIs & Messaging: RESTful Web APIs, Azure Service Bus, Azure Event Grid, Integration Tools

Architecture & Testing: SOLID, N-Tier Architecture, Dependency Injection, Swagger, Unit Testing (Moq), Test Scripts, QA Methodologies

Certifications: Microsoft AZ-900, SC-900, PL-900; SAS SQL Essential Badge, Smarter Prompts by IBMSkillsBuild
